

# Specialised Roof Tile Cleaner

## Cleans Roofing Tiles & Kills Spores

Sierra developed 'Roof Tile Cleaner' from a demand for a solution for removing lichen from terracotta tiles; one of the most difficult to remove contaminants from roofing tiles.

Roofing tiles will with time, become covered in fallout and mould, and then continue to be a haven for fungal growth. Sierra's new Roof Tile Cleaner is designed to strip fallout, and kill and remove all trace of mould and lichen.

### Application:

Roof Tile Cleaner is simply applied neat in a coarse spray via a spray applicator or foaming gun, and left to dwell whilst the chlorinated surface active agents destroy all mould spores, and lift the fallout from the tile. Then simply wash the dirt and mould away with tap water under mild pressure. Ensure that run off is prevented from going into tank water.

Roof Tile Cleaner can also be used to safely clean driveways and paved areas suffering from excessive mould, in the same manner.

On the left side of this roofing tile can be seen the blackened area cause by mould and fallout. There is also spots evident of a lighter shade of a roundish fungal growth. These are normally very difficult to remove as they are 'growing' from the pours of the tile.

The right hand side of the tile has been sprayed with Sierra Roof Tile Cleaner and allowed to sit for 3 minutes, then washed off with tap water under mild pressure.

### Characteristics

<b>Appearance:</b>	Clear Liquid
<b>Specific Gravity:</b>	1.15
<b>Flash Point:</b>	n/a
<b>Odour:</b>	chlorine

### Evidence of heavy build up of fall out and mould.
